SUMMARY

QA Automation Engineer with over 5 years of hands-on experience in **web** and **mobile** testing, **Selenium**, **Playwright**, JavaScript/TypeScript, Java, **Jenkins**, **SQL**, **Jira**, and **Azure DevOps**. A speech impediment has never held me back from delivering high-impact E2E automation solutions, CI/CD integration, and testing efficiency improvements across finance, commerce, healthcare, government, and transportation.

EXPERIENCE

QA Automation Engineer | Heirloom4life | Aug 2026–Present

- Tested an AI-powered voice memoir platform (web and mobile) that preserves life stories, voice, and memories through conversational AI interviews, transcribing recordings into structured digital memoirs
- Validated user flows for secure, private memory preservation and family access, including voice recording, multilingual **Gemini** voice interviews, and shared family history
- Developed a **Gemini** voice API integration for multi-language testing using a GitHub template and **Claude Code**, reducing manual conversation testing by **40%**
- **Reduced** test case creation time by **50%** by using **Gemini** to generate test cases from documentation

QA Automation Engineer | Techtopia | 2025–Apr 2026

- Built E2E UI automation framework infrastructure using Selenium/Java for **MyFinancePlan** (**SaaS**) and Playwright/TypeScript for **Printup** (**SaaS**), a graphic production system supporting print-house sheet workflows
- Integrated automated testing into CI/CD pipelines using GitHub Actions, Docker, Bash, Allure reports, and Grafana k6 for load testing
- Used **Claude Code** and MCP-based tools to accelerate test development and refactoring
- **Reduced** testing and deployment time by **50%** through AI-assisted test generation, Azure Test Plans integration, and Playwright infrastructure
- Accelerated production deployment and customer delivery by **40%**

QA Engineer | RRsystems | 2023–2024

- Tested a healthcare management system serving medical centers, clinics, and health funds through manual testing and targeted E2E automation using Puppeteer/TypeScript
- **Improved** test documentation & execution efficiency by **20%** using Azure DevOps test plans
- **Reduced** regression and verification time using **IIS-based** validation of Dev branch changes

QA Engineer | Malam Team | 2013–2022

- Tested enterprise web, mobile, and API systems, including the **AgilePoint** business process management platform
- Managed on-premises Windows/Linux virtual machine environments, working with VMware, Hyper-V, RemoteApp, Active Directory, SQL Server, and IIS. Worked extensively with Terminal Servers and virtualized application delivery
- Built reusable **Postman** collections with environment variables, OAuth/JWT authentication, assertions, and negative test cases; automated API checks using **Newman** as part of regression flows
- **Reduced** API integration time by **40%** using **Swagger** API validation
- **Executed** regression & sanity testing via **Jira**; **reduced** bug reopens by **25%**

EDUCATION

2008 - 2010: Practical Engineer, Computer Science, Afeka College of Engineering
2014 - 2015: ISTQB Certification
2017 - 2018: Network Administrator, INT College
2023: AWS Certified Cloud Practitioner
2024 - 2025: Full Stack Automation, Atid Automation College

LANGUAGES

Hebrew - Native | **English** - Fluent
