

ILYA RAHMLEVICH

QA AUTOMATION ENGINEER

+972 546686031 | irahmilevich@gmail.com | [LinkedIn](#)

SUMMARY

Challenge, Achievement, Learning.

QA Automation Engineer with over 5 years of hands-on experience in **Web & Mobile** testing, **Selenium**, **JavaScript**, **Jenkins**, **SQL**, **Jira**, and **Azure DevOps**. A speech impediment has never held me back from delivering high-impact automation solutions that increased sales and satisfaction across finance, commerce, government, transportation, and healthcare industries.

EXPERIENCE

2025 - 2026/04: QA Automation Engineer, Techtopia

Implemented robust **UI automation** frameworks using **Selenium + Maven (Java)** and **Playwright + TypeScript** across two production web projects. Designed and executed **E2E test** suites for **MyFinancePlan** (SaaS) and core user flows in the graphic production system, including Printup for print-house sheet workflows. Integrated automation into **CI pipelines (GitHub Actions, Docker)**, including **Bash** scripting to parse **XML** test results, generate **Allure HTML** reports as artifacts, and automate load testing with **Grafana k6** via multi-stage pipelines. Leveraged **Claude Code** and **MCP-based** tooling to accelerate test development, generate and refactor automation utilities, and prototype validation flows, while maintaining code standards, reviews, and production-grade quality.

- **Reduced** testing and deployment time by **50%** using Claude to generate test cases from Excel specifications, integrated them with Azure Test Plans, streamlined production processes, and established Playwright automation infrastructure.
- **Reduced** script writing time by **50%** via reusable test components.
- **Accelerated** production deployment & customer delivery by **40%**.

2023 - 2024: QA Engineer, RRsistemas

Enhanced automation coverage while performing primarily hands-on manual testing for a web system used to manage medical centers, clinics, and health funds (e.g., diagnostic institutes and healthcare service providers). Owned **Azure DevOps** test plans & reports, replacing spreadsheet-based testing with structured test management. Toward the end of sprints, built targeted **E2E automation** using **Puppeteer** with **TypeScript** to validate critical user flows, aligned with real business workflows and strict data-privacy constraints.

- **Improved** test documentation & execution efficiency by **20%** using **Azure DevOps** test plans.
- **Reduced** regression and verification time using **IIS-based** validation of Dev branch changes.

2013 - 2022: QA Engineer, Malam Team

Led QA for large-scale on-prem enterprise systems with a strong hands-on focus on system-level QA. Set up and manage **Windows** and **Linux** virtual machines, including **VM** migration from **VMware** to **Hyper-V** to improve performance and stability. Worked extensively with Terminal Servers and virtualized application delivery (**RemoteApp**, **Active Directory**, **SQL Server**, **IIS**), and performed mobile testing for the AgilePoint business process management platform, alongside comprehensive web and **API** validation using **Swagger** and **Postman**, building reusable **Postman** collections with environment variables, **OAuth/JWT** authentication, assertions and negative test cases; executed automated **API** checks via Newman as part of regression flows.

- **Reduced** API integration time by **40%** using **Swagger**-driven API validation.
- **Executed** regression & sanity testing via **Jira**; **reduced** bug reopens by **25%**.

EDUCATION

2008 - 2010: Practical Engineer, Computer Science, Afeka College of Engineering

2014 - 2015: ISTQB Certification

2017 - 2018: Network Administrator, INT College

2023: AWS Certified Cloud Practitioner

2024 - 2025: Full Stack Automation, Atid Automation College
